Propane / Shielding Gas / Air Reel Connection Instructions

1. Remove drum access door
2. Route hose through drum at handle end at (A)
3. Connect hose to fittings on swivel block (B)
4. Reinstall drum access door
5. Make cable connection to supply bottle at (C)
6. If hose inlet orientation into reel is not suitable, loosen the two set screws (D) on bracket, change orientation to your liking and re-tighten set screws
7. Regular maintenance is required on all reels
